FLAGSHIP TALK

INTELLIGENCE IS THE NEW PURPOSE: CONSCIOUSNESS SHIFTS SHAPING THE NEXT ORGANIZING PRINCIPLES OF REALITY

Intelligence Is the New Purpose explores a consciousness expansion underway and the impending identity shifts in every domain that will move us from 'purpose' as the north star to 'intelligence' as the new organizing principle of reality. "What's my purpose?" becomes, "What field of intelligence am I cohering with?" Perceptual intelligence, natural intelligence, ancient intelligence, cosmic, plasma, human, informational, artificial, emotional, and universal intelligences are trending.

As we individually and collectively shift our identity from old stories that no longer align with where we're going, we aim for purpose. Yet 'purpose' as a compass no longer matches our expanded awareness of who we are, these vague times of uncertainty, and our higher human potentials. In the lost sea of our collective identity we're naturally cohering to higher states' of potential. This is where we lean in to a 'field' of Intelligence. Our collective compass is shifting. Living information - 'intelligence' - will guide our perception, meaning making, storytelling, leadership, fulfillment, and how we innovate our future into being. This talk shares why and how.
