KEYNOTES & SALONS

Explore bespoke transformational topics and programs to serve your community and where you're ready to go...

01

Intelligence is the New Purpose: Consciousness Shifts Shaping the Next Organizing Principles of Reality

Drawing on perceptual intelligence, consciousness research, and distinctions between ancient intelligence, indigenous wisdom, modern knowledge, and future intelligence, this keynote examines intelligence not as cognition, but as information and energy moving through fields.

02

Rise of the Conscious Futurist

The mechanistic corporate futurist casts spells of where we're going based on metrics, data, and influence. Come on a journey and learn the discipline, abilities, and gifts of a Conscious Futurist who draws on a different field of intelligence, gnosis, and agency to challenge inevitability narratives and reclaim our role as stewards of life giving human and planetary evolution.

03

Conscious Influence: The Story We Spell Is the Outcome

Influence today operates faster than ethics, deeper than awareness, and often outside conscious choice. This talk gives a practical framework for dialing in the power of conscious influence for aligned personal, group and collective impact. Participants walk away with a deeper awareness of what influences them (bias, assumptions, worldview) and how they influence the world so they can put new practices in place for real change.

04

Beyond Climate: Expanding Perception to Connect with Earth Energies

Merging ancient intelligence with indigenous and modern wisdoms, Stephanie inspires a refreshing lens for ethical innovation with a life giving worldview, like harnessing energy without extraction. This talk will expand perspectives beyond old climate narratives.

Stephanie TRAGER

JD. Conscious Futurist

Not your ordinary strategist, Stephanie is a dot connector, systems thinker, blindspot seer, and oracle of earth, facilitating transformation in places

and spaces that permanently disrupts the status quo. Initiated in multiple shamanic traditions from a young age, her business and legal acumen is rooted in the wisdom of earthkeeper traditions.

Dubbed 'an oracle,' 'purpose whisperer,' 'wellness rebel' and 'legal midwife' she couples sharp business acumen with potent intuitive gifts. Stephanie leverages 30+ years of multidisciplinary expertise as a trusted advisor, spiritual confidante, conscious futurist, and secret corner woman to UHNWIs, principles, investors, next gen creators, visionary leaders, and entrepreneurs. She serves at the intersection of ancient and future intelligence, awakening mastery and evolutionary abilities in clients who are asking 'what's next.'

Stephanie leverages a vast portfolio of solutions, including rewiring personal and collective traumas, ethics, governance, impact, and leadership counsel, emotional intelligence, personal mastery, and evolved business, with systems level frameworks, integrating left brain strategy, neuroscience, NLP, and positive psychology, with hypnotherapy, shamanism, and laser coaching. Clients also leverage an extensive aligned network. With decades of off the beaten path experience on the frontlines of environmental justice, human and indigenous rights, she co-founded a corporate responsibility law firm in the 90s, and helped preserve the last remaining stands of unprotected ancient redwoods in California. Stephanie spent years immersed in the philanthropic, impact investing, and innovative business space helping catalysts deploy their capital(s) in alignment with their values and our collective highest potential.

She serves on the Board of Dream Change, an NGO helping rematriate Indigenous lands for the Kogi of Colombia and Maya of Guatemala, served as chair of the American Bar Association's Environmental Justice Committee, authored articles on the Human Right to a Clean Environment, worked on Holocaust Reparations initiatives, co-created the first trial monitoring committee in the US to thwart judicial corruption, and serves as strategic advisor to non-profits, including Toniic Institute where she curated experiences and helped develop a 3 year educational curriculum for impact investors. From frontline activism to corporate litigation at Davis Polk, she's a wellness rebel, shamanic healer, idea wizard & new earth storyteller with 5 planets in Aquarius and a massive love for ancient trees. Stephanie is currently researching and writing on Perception, Human Potential, & Future Intelligence.
